SUMMER 2015

1-on-1

AIM HIGH
WE'LL BE RIGHT BESIDE YOU.

Back to Basics Learning Dynamics offers a full range of educational summer options just right for *your student!*

Make your summer *count!*

Summer School (K – 8th)

Build skills and confidence by completing summer school requirements in a 1-on-1 environment geared to each student's specific needs.

Credit Recovery (9th – 12th)

Has your student failed a course and your previously-scheduled vacation now conflicts with summer school? Have your student take the course 1-on-1 to get on track for next year.

Original Credit (9th – 12th)

Your student can take a course 1-on-1 over the summer to get ahead for next year, lighten course load, enhance transcripts, or catch up on previously skipped credits.

Summer Reading Program

Our experienced instructors will work 1-on-1 with your student to read, comprehend, retain and apply summer reading material. These sessions will provide students with the knowledge and confidence to complete any required reading-related assignments, such as reports, projects and tests.

Summer Math Program

Summer is the perfect time to build and strengthen mathematics skills for the upcoming school year. Students will work 1-on-1 with an experienced instructor to review and learn concepts and create fun ways to remember them. Each session is tailored to the individual child to meet his or her needs, interests, level of background knowledge and learning style. Homework will be given to reinforce the material learned during these interactive sessions.

Final deadline for scheduling Reading or Math is August 7, 2015.

1-on-1 SAT and ACT Prep

With college enrollment numbers reaching an all-time high, competition to gain acceptance is fiercer than ever. Help your student put his best foot forward with 1-on-1 SAT and ACT Prep this summer. A completely customized, 1-on-1 approach focuses on those specific areas needed by each student. Students may take any or all content areas to strengthen their knowledge, reduce anxiety, and build confidence every step of the way. They will learn strategies specific to the tests, timing techniques and have the opportunity to take and review practice tests. Instruction includes book and testing timer.
